### **Why Summer Camp?**

Summer is one of the best times to concentrate on the performing arts. With the pressure of the academic measurement behind the student, the potential performer can seriously study and develop his or her talents. Affective, or physically applied learning, is best accomplished when a student can devote full attention to the performing arts.

Through a logically organized, day-to-day course of study, the needed technical repetition can be accomplished; resulting in a quality performer. The summer affords this kind of time. The artistic process is a long arduous development but one which is fulfilling, satisfactory, and enjoyable. One for which the Albano Ballet is world renown.

---

## ALBANO BALLET ACADEMY

specializes in pre-school dance training starting at age 3. Becoming a "ballerina" is part of the special magic inspiring little children. At a young age, they freely move and kinetically mimic. It is at this time that they must be encouraged to dance.

## ALBANO'S NUTCRACKER

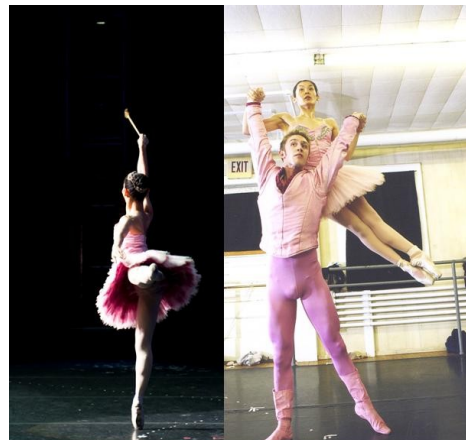

Students enrolled in the summer intensive have the opportunity to jump start their participation in Albano's Nutcracker. Albano's Nutcracker, performed at Mohegan Sun Arena, Central Connecticut State University and MHS Performing Arts Center has become the largest, longest running, most elaborate production in

Connecticut and surrounding areas. It is the biggest

Nutcracker between Boston & New York. This lavish production is open to all dancing students enrolled in the summer intensive and to all outside students by audition. Dancing in Albano's Nutcracker gives children the opportunity to work hand in hand with professional dancers from all over the world in a professional production with designer costumes and scenery as well as a live orchestra.
